

# REMOTIVE

INDUSTRIAL MAINTENANCE

## WORKSHOP ACTIVITIES

Thanks to our central location, high-tech equipment and a motivated top team as our greatest assets, we have everything necessary to handle even the toughest overhaul jobs with ease. Moreover, we possess the expertise and state-of-the-art equipment required to swiftly and effectively maintain and repair a wide range of industrial, rotating machinery. We also provide transparent and detailed reports after every overhaul job including recommendations for future maintenance and repairs.

## ABOUT US

Remotive is a brand-independent overhaul company that puts honesty and transparency first. Our dream was born in 2015, driven by a passion for delivering the best possible service to our customers. We prioritize transparent communication both with our customers and our employees. We work together as a close-knit team, where each member can count on the other, and new friendships are formed. In our working environment, personal growth and individuality are highly valued. With a good working atmosphere and flexible work environment, we are able to guarantee excellent and fast service to each of our customers. At Remotive, we never compromise on quality. With a strong focus on safety and a commitment to putting quality first, we have become a respected name in the industry.

## OUR MISSION

Thanks to our commitment to personal development and outstanding service, we guarantee the best quality for all your technical needs. Our team of highly trained professionals is dedicated to delivering honest and reliable service that tackles any technical challenge that comes your way and saves you precious production time.

**“REMOTIVE, WE SAVE TIME”**

### PUMP OVERHAUL

Our workshop is equipped to provide any type of pump - up to 20 tonnes - with the necessary maintenance and overhaul, including rotor balancing as part of our standard procedure.

### GEARBOXES OVERHAUL

We have a large induction heater and a press with a capacity of 100 tonnes, allowing us to dismantle large gears and couplings without any problems.

### BLOWERS OVERHAUL

We can overhaul any type of blower, including high-speed machines.

### FAN OVERHAUL

We can overhaul fans in our own workshop, but we also have the knowledge and equipment to carry out an overhaul at the customer's site.

### ELECTRIC MOTOR OVERHAUL

We can efficiently overhaul and repair (ATEX) AC or DC motors.

### BALANCING WORKS

Our workshop has several balancing machines, the largest with a capacity of 15 tonnes that goes up to 11 metres and can handle balancing over a maximum diameter of 2.8m.

### TURNING AND MILLING

Although machining is not part of our core business, we can also provide our customers with quick solutions in relation to this. We have the necessary turning and milling machines to handle any type of milling work that may be required during an overhaul.

### REPORT

Upon dismantling a machine, we provide our customers with a comprehensive report including an overview of the damage, additional information and possible recommendations.
